**1. Monsieur Jacquard Makes a Re-Appearance at AVL**

Convergence 2002 saw the reemergence of AVL as a major player in the jacquard market. Many of you know that for a few years, we have been marketing a jacquard loom in conjunction with a French company, but we wanted to make the loom more accessible. So, we've been busy here in Chico.

Our new jacquard is, to our knowledge, the lowest priced electronic jacquard in the world. Plus it can be combined with a dobby to create a new style loom: more than a jacquard; more than a dobby; not quite drawloom ... it's a dobby-jacq.

[Read all about it](#) and [see some pictures too](#).

**2. The AVL Web Site is now in SIX Languages!**

Know a weaver who speaks German? Or French? Or Spanish? Or Italian? Or Portuguese? If so, then

direct them to our [Home Page](#). There they'll find the word TRANSLATE translated into these five other languages. Then they're just a few clicks away from having the whole web site translated. It's an amazing technology; each succeeding page is automatically translated.

### 3. Did you know?

Did you know that AVL still carries a special [shuttle](#) for fine silks and slippery yarns?

Did you know that our best selling accessory ever is the [Patent Denter](#)?

Did you know that we still build Selvage Rollers, Warp Beam Flanges, and Shuttle Trays? Do you know what they do and how they function?

Did you know that [Home Looms](#) can now use a Compu-Dobby III?

Did you know [Folding Dobby looms](#) now come in 48" as well as 40" width?

Did you know that we have some incredibly great deals on [Factory-Refurbished 60" Production Dobby Looms](#). Incredibly low, that is!

Did you know that [AVL Professional Dobby Rug Looms](#) can now come with 16 harnesses?

Do you know what a Pressure Roller is and what it does?

How about Ring Temples?
